ABOUT US | ROOFS | WINDOWS | GUTTERS & FASCIAS | WALLS | DRIVEWAYS & FOOTPATHS

**About Us**

OutCide Environmental Services Limited is an exterior cleaning company based in Headford, County Galway, which provides cost effective and environmentally safe cleaning solutions throughout Galway and Mayo.

Owned and operated by Seamus Staunton, OutCide offers a range of cleaning services to refresh and rejuvenate the exterior of your home and garage, for roofs, walls, gutters, fascias, windows, footpaths, driveways and patios.

OutCide removes and treats unwanted biological growth like moss, lichen, red and green algae, using tested and safely applied biocide chemicals, without causing damage to your roof and hard surfaces, or any harm to the environment. Biocide soft wash treatment is a modern, effective and long lasting alternative to the abrasive results previously caused by high pressure power washing.

Services offered include:

- Soft wash roof and wall cleaning using biocide treatments with high reach pole & brush systems.
- Hot pure water window, frame and UPVC cleaning using the latest water fed pole systems.
- Gutter and soffit cleaning using our wet and dry vacuum systems.
- Driveway and footpath cleaning with our Membrane Surface Cleaner and wet vacuums.
- Seed and biological growth treatment using our pre-soak primer for biocide applications.

Before we commence work OutCide will provide a free survey of your property with a detailed quotation. All work is fully insured and undertaken only when agreed by the homeowner.

For further information on exterior house cleaning requirements or a free survey and quote, please contact Seamus Staunton.

For your peace of mind, OutCide Environmental Services Limited has arranged comprehensive Public and Products Liability Insurance, and can provide proof of cover before commencement of work.

**Walls**

Remove unsightly growth like moss, lichen, red and green algae from external walls with our safe and effective soft wash chemical treatment. An essential treatment prior to painting rough cast render.

OutCide's soft wash cleaning system is suitable for all kinds of wall finishes including natural stone, brick, ragged plaster, rough cast render, pebbledash, lime rendering and aluminium siding.

This safe and modern treatment is highly effective against biological growth like moss, algae and lichen, fungi, lichens, and the common red algae contamination seen on pebbledash walls. Galway and Mayo.

To clean your walls we apply AlgoClean Pro Softwash (Prepared for direct use) using high reach poles & brush systems from the ground level. Unlike traditional high pressure power washing jets, soft wash systems prevent any damage caused to the wall surface or existing plasterwork, while our minimal treatment results in the application of new paint to prevent further growth.

The biocide chemical solution kills the actual biological growth, and the weather cycles of rain and sun continue to clean the remainder of spores from the wall surface over the next couple of months. The cleaning timeframe varies from 6 to 8 weeks and the severity of the weather, but cleaning is normally complete within a year and the cleaning process will continue to help to last years. For more information or a free survey of wall cleaning for your House in Galway or Mayo, please contact Seamus Staunton on 086 820 4711 or email: [info@OutCide.ie](mailto:info@OutCide.ie). We will be happy to provide you obligation quote and estimate the cleaning timeframe and enable you to budget expect to see your property.

Designed for weather conditions in Ireland, AlgoClean Pro Softwash kills the moss, algae, fungi and lichen within 2 hours of application and the cleaning process starts to add immediately, with visible results commencing as soon as 24 hours.

Treatment targets:

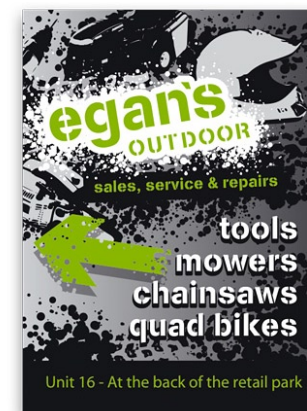

- Moss
- Green Algae
- Red Algae
- Cyanobacteria
- Fungus
- Lichens

## HEATING OPTIONS

Burn wood, peat, briquettes, coal & smokeless fuel

### Western HEATING OPTIONS

Solid Fuel & Multi-Energy Boilers

Efficient, Economical & Renewable

Heat Your Home For Less

Due to the increasing cost of heating oil we are now looking for cheaper ways to heat our homes, and one solution is to complement your existing oil boiler with a cost-effective Solid Fuel or Multi-Energy boiler from Western Heating Options.

These efficient and economical boilers are suitable for burning common fuel types readily available in the west of Ireland, bringing an economical alternative to heating oil to heating suppliers and builder's providers in Mayo, Sligo, Roscommon and County Galway.

**RAKOCZY**

We supply Rakoczy wood burning and solid fuel boilers to the heating and building trade. All our Rakoczy products carry a 50 month warranty and are manufactured in Poland to the highest standards since 1965.

**JÄSPI**

Our Jäspi boilers are a leading range of Multi-Energy appliances manufactured in France for over 20 years, and each Duo 2 boiler comes with a 25 year warranty.

**Mi-Flues**

Our stainless steel twin wall insulated flues are made in Ireland by Mi-Flues, one of the Irish companies to manufacture domestic flues and established since 1986.

AgriSafe is a specialist farm safety signage business based in County Mayo, and serving the surrounding counties.

We provide a wide range of signs that cover all aspects of the agricultural industry to help you meet your health and safety requirements in line with the Tescap guidelines and the Health & Safety Authority.

Our signs are durable, cost-effective and can be fully customised with your own specific details, which helps to discourage the theft and redistribution of your signs.

Correctly applied signage can also help protect your farm with issues of public liability and problems of trespass to property by clearly indicating boundaries and hazards.

Our signs are printed, laminated and mounted on C-Block aluminium composite panels, making them rigid, lightweight and weather resistant.

All signs are suitable for both interior and exterior use, and are pre-drilled for speedy and convenient fitting.

We can also supply Correx board signs (like auto-seener signs) as a quick and cost-effective solution for temporary signage requirements.

### Types of Sign

**Prohibitive Signs** are clearly marked as a red circle with a white background. The red circle may also contain a symbol that represents the type of behaviour that MUST NOT occur.

**Warning Signs** are presented as a yellow triangle with a black border. The triangle contains an exclamation mark or symbol indicating the nature of the hazard or warning.

**Mandatory Signs** have a blue circle on a white background, and a white symbol indicating a specific action that MUST take place.

**Traffic Control Signs** are recognised as a red rectangle or square with white text explaining potential obstacles or hazards.

**General Information Signs** are often shown as white text on a green or blue background. These signs are usually displayed separately from safety signage.

### Sizes and Materials

Our collection of manufactured safety signs come in a range of sizes to suit your specific requirements. Custom sizes can also be made to order on request.

Size A	300mm x 200mm	12" x 8"
Size B	400mm x 300mm	16" x 12"
Size C	400mm x 300mm	16" x 12"
Size D	610mm x 410mm	24" x 16"
